Press release

Kanematsu Futuretech Solutions Corporation

Announcement of a distributor agreement with u-blox AG

Kanematsu Futuretech Solutions Co. has signed a distributor agreement with u-blox AG (hereinafter u-blox), headquartered in Thalwil, Switzerland.

u-blox is a well-established manufacturer in the worldwide market providing GNSS positioning and wireless communication (Cellular, Bluetooth / Wi-Fi and V2X) modules (chips) for the automotive, industrial and consumer markets. Their products make it possible to pinpoint the location of people, cars, and equipment, and transmit it via wireless communication.

With a broad portfolio of modules (chips) and software, u-blox enables customers to develop high-performance, high-quality IoT / M2M solutions quickly and cost-effectively. As u-blox operates in more than 28 locations worldwide including the Thalwil's headquarters and Japan, they can respond quickly to customer requirements and have a strong system to share knowledge and market requirements with customers.

KFT and u-blox are delivering the best GNSS positioning and wireless communication modules for IoT / M2M solutions in the markets to take customers beyond expectations with the highest quality and reliability.
